PROFILE

ML engineer and data analyst with hands-on experience in production data pipelines, anomaly detection, and cybersecurity operations. Strong foundation in deep learning, NLP, and computer vision — with end-to-end project delivery from model training to deployed APIs.

EXPERIENCE

Data Analyst & Cybersecurity Associate — Innovative Toll Solutions, Nairobi Dec 2023 – Jul 2025

- Cleaned, explored, and modelled operational logs and transaction datasets
- Built dashboards and automated reporting pipelines used by operations teams
- Performed log-level anomaly detection, alert triage, and traffic pattern analysis
- Supported engineers on pipeline resilience following DDoS incidents

SELECTED PROJECTS

Deepfake Detection + RAG Explainability 2025 – 2026

Xception CNN on 140k images. RAG pipeline (FAISS + LLM) for natural-language explanations. Deployed on HuggingFace Spaces (FastAPI) with React/Vite frontend.

Swahili GPT 2025

Character-level GPT trained from scratch on 65M characters of Swahili news. Low-resource language modelling for an underrepresented African language.

Phish Transformer 2025

Transformer-based phishing URL classifier fine-tuned and deployed as a text classification model on HuggingFace.

Malware Static Analysis 2026

PE-level static analysis of real malware samples including Poison Ivy. Anti-VM evasion detection, sandboxing on REMnux/FLARE-VM. Published technical writeups on Medium.

TECHNICAL SKILLS

Languages: Python, C, SQL, Bash

ML / DL: PyTorch, TensorFlow, Scikit-learn, HuggingFace Transformers, FAISS

Security: Malware analysis, reverse engineering, PE static analysis, REMnux, FLARE-VM

Tools: Git, Linux, Docker, FastAPI, React/Vite, Jupyter

EDUCATION

Pan African University (PAUSTI), Nairobi — MSc AI & ML 2025 – present

Kenyatta University, Nairobi — BSc Statistics & Programming, *First Class* 2019 – 2023
