

Ramadhan Adam Zome – MSc Artificial Intelligence (PAUSTI)

✉ ramadhanzome@gmail.com · 📞 +254 111 237 428 · Nairobi, Kenya

Objective

Applicant to the **PAU-Hiroshima University Exchange (May 2026)**.

Research focus: **Machine Learning for Windows malware detection** (open-set recognition, robustness, explainability).

Planned MSc thesis: **AI applications in malware analysis for PC/Windows environments**.

Education

MSc in Artificial Intelligence and Machine Learning –PAUSTI (hosted at JKUAT), 2025–present (Year 1)

BSc in Statistics & Programming – *Kenyatta University, 2024*

Relevant courses: Probability & Statistics, Data Structures, Algorithms, Programming, Database Systems.

Work Experience

Innovative Toll Solutions – Data Analyst & Cybersecurity Associate
Nairobi, Kenya – Dec 2023 to Jul 2025

- Led data cleaning, exploratory analysis, and modelling on operational logs and transaction datasets.
- Developed dashboards and reporting pipelines used for decision-making by operations teams.
- Conducted log-level anomaly detection and security monitoring (alert triage, traffic pattern identification).
- Collaborated with engineers to strengthen ingestion pipelines and improve resilience after DDoS attacks.
- Work in this role sparked my research interest in **AI-driven malware detection and analyst tooling**.

Technical Skills

- **Programming & Data:** Python, NumPy, Pandas, SQL, Linux, Git

- **AI/ML Libraries:** Scikit-learn, PyTorch, TensorFlow
- **Visualization & Tools:** Matplotlib, Seaborn, Tableau, Jupyter Notebooks
- **Cybersecurity & Systems:** Virtualization (VMware), sandboxing (REMnux, FLAREVM awareness), PE static feature analysis (imports, sections, strings)

Projects & Coursework

- Malware analysis labs and adversarial ML.
Explored sandboxing practices, static vs. dynamic malware detection, and explainable AI methods
- Research interest: Open-world Windows malware detection with self-supervised binary embeddings and few-shot adaptation (planned MSc thesis topic under discussion).
